

3 AUGUST 2025

AROUND 15 September 2026 I decided to shut down our several Green Cemeteries, with the exception of The Russell Family Cemetery for the following reasons:

1. I am 81 and crippled and my wife will be 81 in November and is confined to a wheelchair.
2. Our daughter, Karen Lee Russell, was trained and prepared to help Kristi and Mike Zeltner manage our wildlife sanctuaries, botanical preserves, and archaeological sites and green cemeterie, but was brutally murdered on March 30,2021.
3. I told a person 'interested' in acquiring a lot that I had shut the cemeteries down and was literally begged to let her be the last person to acquire a lot.
So, I agreed. Big mistake. I went to wait for the person to arrive, and it was two hours in the broiling sun without a/c when she finally showed up with her family.
4. None of the four adults were prepared to provide me with GPS location of the grave site they chose. They had no hammer to drive the metal post to mark the spot nor any tape to make it easy to find the post.
5. They called me 9 times yesterday alone and yet although I paid to have the gate to the pyramid and comfortable seating available, they showed no interest.
6. I was literally starving to death and since they hadn't arrived after me waiting in the heat for two hours, I sent to lunch.
7. They complained that they arrived and were sitting in their car waiting and I told them that I would arrive as soon as possible, which I did.

THAT DID IT and made me realize that I am too old and crippled and no longer have the energy or will to spend days and hours dealing with people that don't know the rules and don't want to follow them.
